Abstract

This research paper focuses on the security issues of Cloud computing in the sector of micro, small & medium enterprises (MSMEs). The more MSMEs competition intensifying and earlier adaption of latest internet based application and services have led to greater opportunities that are worthwhile to be seized. The opening up the world IT based markets has posed many challenges with the flooding of IT enabled services and applications. It makes an aim come true for the users to get all the resources instantly from various locations that are not known. But there are lot of hurdles in accomplishing this idea in the form of security parameters and backup issues.

Author Keywords

MSME(Micro,Small and Medium Enterprises), SLA,SSL technology, firewall, Middle server.
