HOW SAFE DOES E- SURVEILLANCE MAKES USE OF ATM KIOSKS

GAURAV ⁽¹⁾

⁽¹⁾ UNDER GRADUATE SCHOLAR, DEPARTMENT OF COMMERCE, CHRIST (Deemed to be University), Bangalore, India.

Abstract

Research motivation: bankers are shifting from the traditional security method of manned personnel outside ATM to completely centralised E surveillance to secure ATM kiosks.

Research methodology and materials: The researcher has used literature review to learn about the factors being affected with the technology. The observed data arranged for the final discussion and the inference. Major source of input has been confined to legitimate sources.

Research objectives and aim: the aim of the study is to evaluate the risks involved with the E surveillance being considered as the only full proof plan against the serious problems related with ATM machines. The study also aims to analyse the important discussions and the points made in past literature review. Another main focus of the study is to see how this technology will affect the job availability for guards in banking sector.

Research discussion: this paper aims to discuss the particular problems which the banks will have to face in regards with their approach towards use of e surveillance. The paper aims to bring out the important factors related to the safety concerns which might arise due to the unavailability of ATM guards.
